Experience

Frontend Contributor, IEEE Society Website | ↗   *October 2024*

○ Designed and developed the "Events" page using React, smooth user interactions, and seamless integration with the rest of the website.

Projects

Coderhouse: Real Time Communication Hub | ↗   *October 2024*
WebRTC, JWT, MongoDB, Express, React, Node

○ Real-time peer-to-peer communication allowing users to connect instantly and collaborate effectively
○ Users can join existing rooms or create new ones for private or group discussions.
○ Secure user authentication with JWT, ensuring safe and private access to the platform.
○ Direct communication between users via WebRTC, providing fast, server-free connections for better performance.

Plant Nursery: E-commerce Platform | ↗   *September 2024*
MongoDB, Express, Node, JavaScript

○ Implemented features like order history, user profiles, and category-based product sorting for seamless user experience.
○ Enabled users to add products to their wishlist for future purchases and easy access.
○ Integrated a review system enabling users to add and view reviews for products to help guide future buyers.

Program Certification

CODESOLISTICE'24 by Protégé IGDTUW | Semester-long Mentorship Program ↗   *Feb 2024*
